

New products by WHD in 2009 HLS 51 Radio

###

Concentrate the music benefit on your ears The invisible HLS 51 Radio by WHD

With our new product, the **HLS 51 radio**, we offer a further, clever installation variant for high-quality audio products to you: The cover installation of a radio. Like the subwoofer HLS 51 SUB also the **HLS 51 Radio** is suitable for the installation into suspended covers. Simply attach the **HLS 51 Radio** to an existing antenna system or install the enclosed throw antenna. For comfortable operation we provide an infrared remote control receiver which can be installed also in the cover. With the portable IR remote control unit you can select radio stations and volume for your personal music benefit comfortably. Combine our halogen spotlight speakers HLS 51 with any existing halogen device (51 mm in diameters) to fit with your own architectural ambience. In addition, conventional loudspeakers are connectable: 1 x 4 ohm, 2 x 8 ohm or up to 5 x 20 ohm loudspeakers. The **HLS 51 Radio** provides thereby the high-quality music receipt you need.

We offer the **HLS 51 Radio** as a single device or in a set with two halogen spotlight speakers of the HLS 51 series (colour: white or silver).
