

New products by WHD in 2009 M 240 Radio basic

###

Hey brother, there are you! The M 240 Radio basic by WHD

A pure, graceful and timeless design - so a qualitatively high-quality radio should be. Our M 240 Radio offers for it a large selection of housing designs and connection options for the individual requirement. The smaller brother, the **R 240 Radio basic**, concentrates on the necessary functions of a radio for the small purse. The plastic housing with lattice and an appropriate screen is held in classic black or white. It has an integrated 230V-power connection, an antenna connection (75 ohms, Koax) and a throw antenna. The devices come with an infrared remote control to easily select your favourite radio station or your pleasant loudness. Plug & Play for your ears comfort. Just connect the throw antenna or your home antenna, plug your power connector, switch it on, choose your favourite radio station and enjoy good sound.
